A Minimal Design for Multiple Spaces

Created in collaboration with visionary designer Todd Bracher, Humanscale's Trea is a multipurpose chair with a sophisticated design that embodies versatility. Trea offers intuitive comfort through an innovative solid state recline mechanism, while its fresh yet classic aesthetic provides stylish support in office and home interiors. Available with a variety of base, finish and upholstery options, Trea can be customised for use in a variety of spaces.

The Trea chair is ideal for:

- Conference rooms
- Collaboration spaces
- Cafeterias
- Home offices
- Living rooms
- Dining rooms

Features

- Innovative **solid state recline mechanism** offers a 12° recline without the need for manual adjustments
- Trea's **contoured shells** cradle the body's natural curves for added lumbar support and mirrors intuitive rotation from the hip
- A sleek **waterfall seat edge** reduces impact to the back of the knees and ensures an even distribution of pressure for ultimate comfort and relief
- **Simple, restrained design** allows the chair to integrate into interiors without overpowering a space
- **Interchangeable bases and a choice of finishes** enable Trea to be easily customised for different environments and uses, but still maintain a uniform visual throughout

“I wanted to design a multipurpose chair with a visual simplicity and unique recline mechanism that would allow it to be used anywhere and by anyone.”

Todd Bracher, Designer

Specifications

Trea and the Environment

Humanscale products are designed with a genuine focus on their environmental impact at every stage of their development. For us, the best designs in the world achieve more with less, and sustainability is the natural result of this focus.

Made from highly durable parts, the Trea chair was built to last. Its unique solid state recline mechanism does not use an erodible metal spring, ensuring the chair will perform as well on day one as it will in 10 years. Due to its robust construction, it will not need to be replaced frequently, thereby minimising landfill and offering a comfortable sitting experience for many years.
